## Experience

2020 - CURRENT

*Purple, Rock, Scissors in Orlando, FL*

### SENIOR SOFTWARE ENGINEER

As a Senior Software Engineer at PRPL, my development efforts have shifted from the standard creative agency projects to working as a contingent worker with Facebook on their infrastructure/stack. Additionally, my focus shifted inwards towards internal process efforts and mentoring/leading developers on the PRPL team.

- Refine internal processes to find new efficiencies
- Mentor developer team to expand their skillset and guide their careers with PRPL
- Work on Facebook infrastructure creating FB branded products as a contracted employee

2018 - 2020

*Purple, Rock, Scissors in Orlando, FL*

### PRODUCT DEVELOPER

As a Product Developer at PRPL, I was the primary developer on multiple large scale applications and projects. Working as the primary developer meant guiding other developers on projects whilst also utilizing communication skills to rapidly and accurately translate client, strategist, and designer creativity into relevant, tested code.

- Develop full stack web projects using a variety of languages including React, NodeJS, PHP, Zend, and more
- Problem solve and adapt to maintain legacy projects while simultaneously utilizing cutting edge technology for new projects
- Acted as a primary developer in both agile and waterfall based projects
- Continuously setup and maintain dev-ops server environments with docker, nginx, haproxy, etc.

## TECHINICAL SKILLS

### FRONT END

- HTML/CSS/JS
- ES6 Syntax + Practices
- React
- NextJS
- Styled Components
- Typescript
- Jest
- Cypress
- CSS Modules
- SASS

- Express
- PHP
- Laravel
- Symfony
- Zend Framework
- MySQL
- NoSQL (Mongo, etc)
- Microservices
- Server Side Rendering
- Headless CMS

### OTHER

- Front to back JAMstack
- AWS
- Docker
- Apache/nginx
- General Dev-Ops

# Experience, cont.

2015-2018

*Skillful Antics in Clermont, FL*

## WEB DEVELOPER

As a Web Developer at Skillful Antics, my job was to create anything from Wordpress websites to full stack ReactJS and NodeJS applications. Both my multitasking and client relation/communication skills improved drastically as I took on multiple leadership roles and had the freedom to expand my skillset in a professional environment.

- Develop and test web pages and applications
- Adequately communicate with clients to achieve a final product and direct the technical conversation
- Use problem solving skills to deal with client issues on a daily basis (over phone, email, etc)
- Develop full stack web products and Wordpress based websites
- Deal with day-to-day issues that arise and problem solve to find solutions quickly and efficiently
- Lead and guide the overseas development team
- Often attend client meetings alone and lead the intake conversation
- Work along a designer and strategist to create efficient and current websites for clients seeking to establish an online presence.

2013-2015

*Publix Super Markets in Windermere, FL*

## CUSTOMER SERVICE OFFICE STAFF

My time at Publix jumpstarted and improved my multitasking skills. Entrusted with store's finances and handled low-level cases that managers could not. Ensured customer satisfaction by applying social skills.
